COVID-19 Production Status Update

April 7, 2020

Gary Plastic / Garyline are following the impact of coronavirus (COVID-19) which is affecting business and our daily lives, and we wanted to provide an update of the preventive measures we have taken and confirm that we continue to remain operational through this difficult and unsettling time.

Our primary concern is the health and well-being of our employees and customers. We are taking the recommended precautions:

- Encouraging employees to wash hand often and to stay home from work if they feel sick. If someone appears sick, we are taking their temperature and anyone with a fever over 100.4 is required to stay home.
- Sanitizing surfaces & workstations – we have designated personnel in each department and in the office to clean surfaces multiple times per shift
- Providing hand sanitizer at dispensing stations throughout the facility
- Providing PPE like nitrile gloves and face masks to all employees
- Social distancing – work stations are spread out so employees remain apart to the greatest extent possible in the office and in production. No large meetings or customer visits. Factory tours have been suspended
- We operate 24 hours in a 300,000 sq. ft. facility, so we are moving work to 2nd and 3rd shifts and staggering breaks to create additional social distance.
- The factory is staffed with only essential personnel with as many people as possible working from home at this time.

Gary Plastic / Garyline is an essential business which provides critical infrastructure to aid Healthcare, Food Service, Electronics and Medical facilities which help people in need during this Covid-19 crisis. In the last week we have converted a portion of our production to produce personal protective Face Shields and Face Masks.

As a primary manufacturer, our inventory is regenerated 24/5 in our 40 injection and blow molding machines. We are not relying on ocean freight/container shipments, so we are not expecting any significant capacity or inventory shortfalls at this time. We are available to help.

The situation is rapidly evolving, so we will continue to provide updates as things change.
